*"Make Kin Not Babies!" - howls Finn*

Donna Haraway has proposed the flattening of the 'interspecies hierarchy' we have inherited and continued to embrace from previous generations. She says, "... we have a mammalian job to do, with our biotic and abiotic sym-poietic collaborators, co-laborers. We need to make kin sym-chthonically, sym-poetically. Who and whatever we are, we need to make-with—become-with, compose-with—the earth-bound." So, now is the time, as fellow 'critters' of the Earth to embrace each other. Hold your dog tight. Let him lay his head on your lap. Listen to his breath as he dreams and you caress his stomach. Touch that spot you know he loves. Stroke his neck. Talk to him in that cute, high-pitched voice you know makes him excited...
